

ECE326 Quiz 9, Fall 2019

Name:

Student Number:

Please write a variadic template function `printAll` to print all the arguments separated by space (See the usage example in main function below).

```
// Start your code here
```

```
void printAll()  
{  
}
```

```
template<typename T, typename ... Args>  
void printAll(T first, Args ... args)  
{  
    std::cout << first << " ";  
    printAll(args ...);  
}
```

```
int main() {  
    //output: Jack Connor 25 1.75  
    printAll("Jack", "Connor", 25, 1.75);  
  
    //output: 1 2 test  
    printAll(1, 2, "test");  
    return 0;  
}
```
